Disconnect Bank Feeds for an account in Quicken Desktop

Turn Bank Feeds off

You can disconnect your accounts from Bank Feeds one at a time.

Quicken Desktop for Windows

1. Click on **Tools** > **Account List.**
2. Click on **Edit**.
3. On the **Account Details** dialog box, go to the *Online Services* tab.
4. Click on **Change connection method** if the option is there. If not, click **Deactivate** instead.
5. Once the account has been deactivated, click on **Set up now.**
6. Select the connection method and click **Next**.
7. Enter your credentials and click **Connect**.
8. When Quicken has returned all accounts discovered for this FI, very carefully LINK each of the found accounts to the appropriate accounts you already have set up in Quicken.
9. Click **Next**, then **Finish**.

Quicken for Mac

1. Click on the account name for your account(s) in the Account toolbar in Quicken.
2. Click the **Settings** icon in the bottom right corner of the screen.
3. Select the **Downloads tab.**
4. Click on **Change Connection Type** (**NOTE:** you'll only be able to change the connection method to one that your bank supports).
5. To see the connection methods available, click **Options**.
6. Continue with the setup.

After you disconnect your account, Quicken won’t download new transactions, until you connect to Quicken Web Connect.
